1. **Title of Presentation** (What is Your Topic):
2. **Explain how this topic is meaningful or important to you personally or professionally. Be as specific as you can. Do not write solely "I've been interested in this for a long time." I want to know exactly why or how this topic is important to you.**
3. **Explain specifically what points or issues your presentation will explore. Remember, your presentation must be analytical and not simply descriptive (defining terms).**
